

V 5 “SAFE-TEE” CONTROL SYSTEM

V 5 “SAFE-TEE” CONTROL SYSTEM

The **Conditionaire “Safe-Tee” V5 control system** is a basic system which complies fully with AS/NZ 2243.8, AS/NZS 2430.3.6 and AS/NZS 3000. The V5 performs and exceeds all the functions specified in these standards.

The V5 is used where a constant volume system is required and does not have the “IVAC” capability.

Over and above the requirements of the Standards the V5 has the following features:

- LCD display indicating all functions and alarms.
- Can support dual displays for double sided units.
- Can support multiple emergency isolators.
- Lighting can be automatic or independently operated.
- Compatible with basic BMS.
- Auto restart to operational mode after resumption of interrupted power supply. GPOs and flammable gases still have to be reset manually.
- Boost function for increased exhaust rate.
- Post purge timer adjustable for schools applications.
- Fire alarm status, when required.
